

Belting &
Reinforcement
Fabrics

Arvind Limited is a 90+ years old conglomerate actively engaged into various textile businesses. Since 2010 Arvind's Advanced Materials Division is providing solutions for various belting and reinforcement applications.

At Arvind Advanced Materials we combine the cutting edge technology, scale and generations of manufacturing experience to offer customised solutions for our customers.

Our vertical integration right from the yarn manufacturing makes us stand out, it allows us to blend perfect mix of fibers in order to achieve the end performance and functionality.

Our manufacturing includes Yarns spinning, Preparatory, Weaving, Needle Punching, Lamination, Heatsetting and Calendaring with automatic thickness control.

To be rest assured for the Enviromental and Manufacturing Systems our production plants comply with Certifications such as ISO 9001:2015, ISO 14001:2003, SA 8000:2014, BS OHSAS 18001:2007.

Our fabrics for belting and reinforcements ranges from 50 cm (20") till 400 cm (157") width for various belting and reinforcement applications. We are providing fabrics from 100 gms/m² (3.53 oz) till 3000 gms/m² (105 oz). Our ability to offer roll lengths upto 3000 lm (9840 ft) and weights of 1100 kgs (2425 lbs) each, makes us the first choice for our customers.

100% inspections and relevant quality reports are provided with each roll without asking.

A range of US/EU FDA approved fabrics are available for Food, Pharmaceutical applications.

End Applications

Logistics , Material Handling
& Distributions

Pharma, Food & Agriculture

Automobile, Textiles & Ceramics

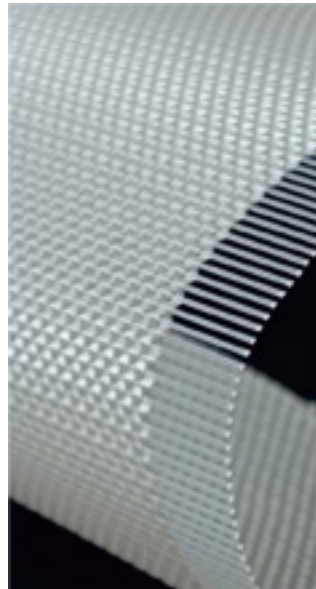

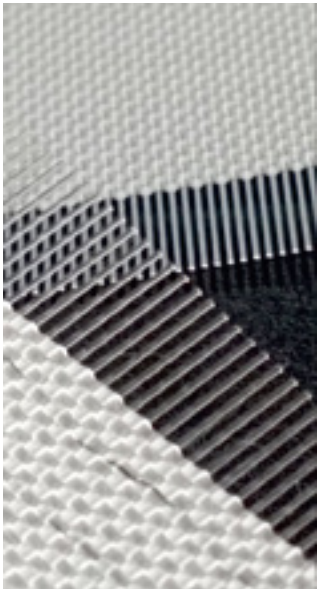

Electronics & Manufacturing

Waste Recycling & Construction

Packaging & Paper

Various Fibers which we can handle are

- Polyester (Multi, Mono)
- 100% Cotton, Poly Cotton Blends
- rPET - Recycled PET
- Carbon & Graphene Antistatic
- Meta Aramids
- Para Aramids
- Mesh Belts
- PPS,PTFE

Sustainability

Zero Liquid Discharge Production Facility

Rooftop Solar Panels for Generation of Green Energy

BCI Cotton, Organic Cotton and Recycled Fiber Product offerings

Recognised as India's most energy efficient textile manufacturing unit.
